

# Triangle TR777

Product Information

# Product Description

## Application

Triangle TR777 Snow Segment Tire designed for Car & SUV winter driving conditions whether it be wet cold conditions, slush or snow, providing the require handling and grip to master the elements.

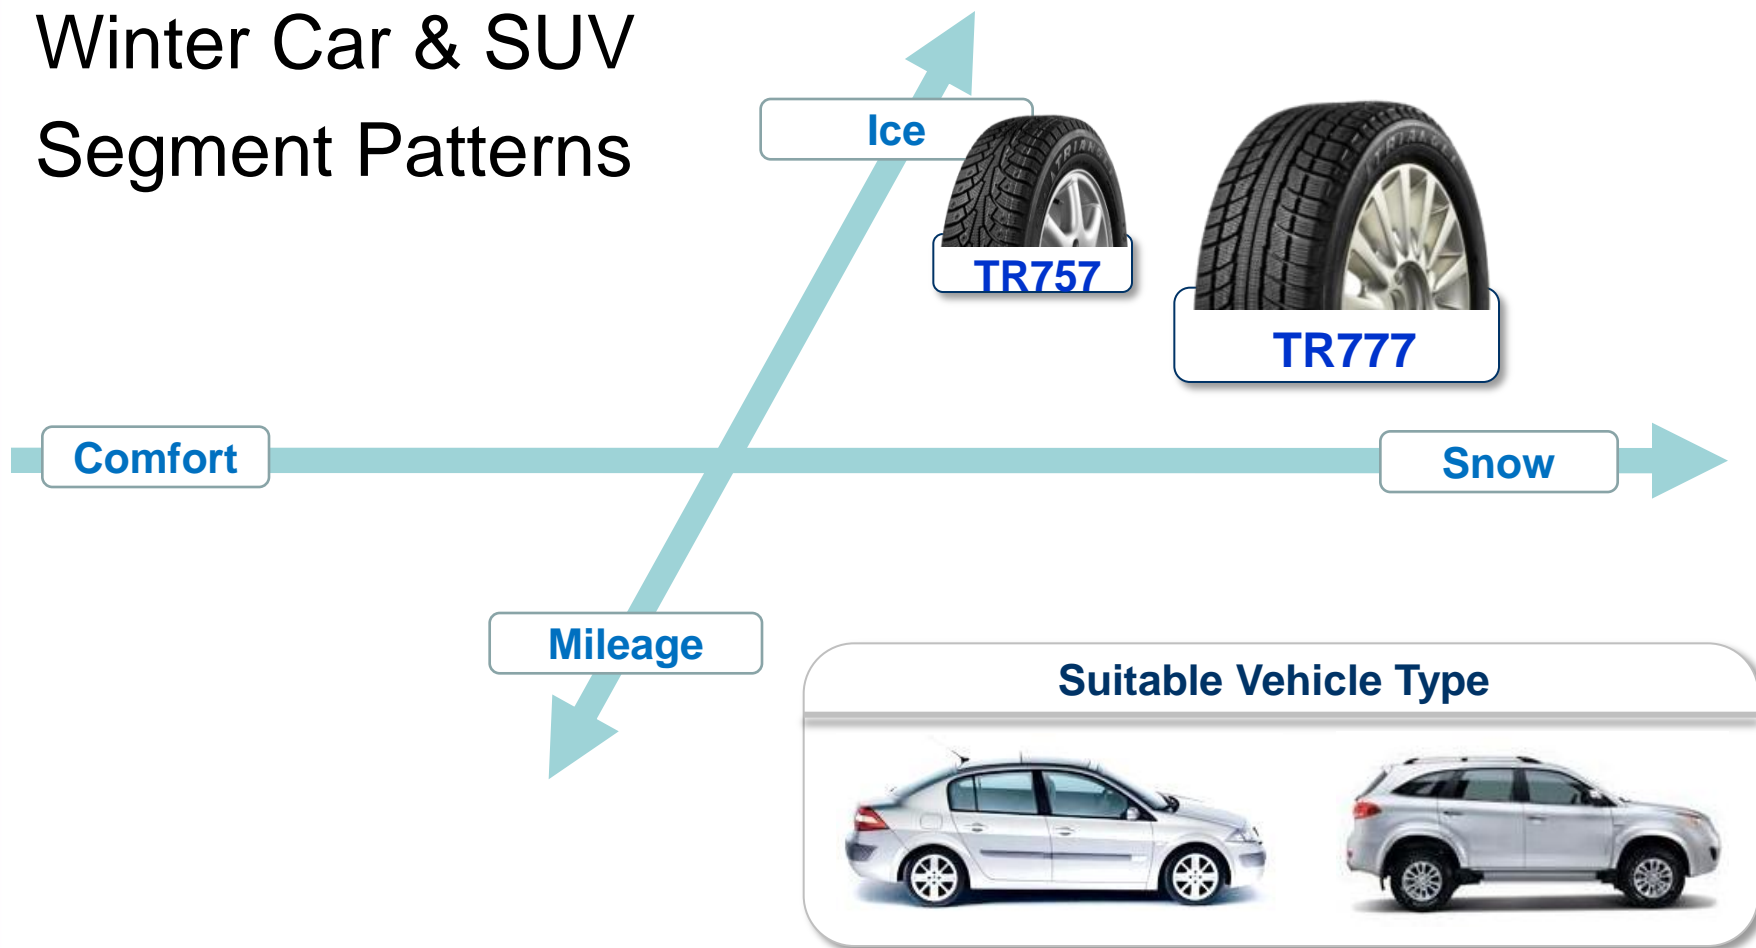

Directional V-type tread with straight center line rib design to provide good straight handling at high speed.

Silica Compound

# Product Positioning

Winter Car & SUV  
Segment Patterns

# Product Features & Benefits.

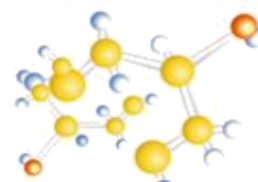

- Compound

***Feature***  
Silica Compound

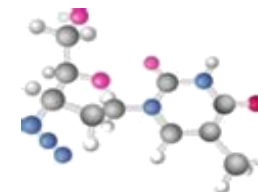

***Benefit***  
Improve the Anti-Sliding  
Performance in Cold  
Weather

**Silica Compound**

Molecule  
High  
**Dispersion** to  
Reinforce the  
Intermolecular  
**Bonding  
Strength**

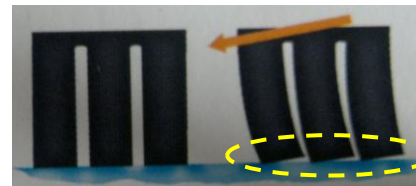

# Product Features & Benefits.

- Pattern Design

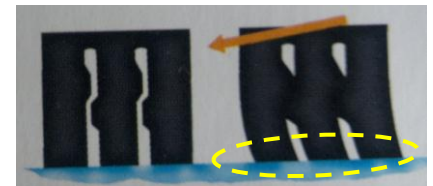

Stress Self-locking Blade Configuration Provide Higher stiffness On high Bladed Design

***Benefit***

Provide Good Braking Performance and Good Handling

**No Self-locking**

**Self-locking**

# Product Features & Benefits.

- Pattern Design

***Feature***

Directional V-type Tread  
with Straight Center Line  
Rib Design

***Benefit***

Improved High Speed  
Straight Handling &  
Aquaplaning Performance

# Product Features & Benefits.

- Pattern Design

***Feature***

Small Block Pattern  
High Density Blade Design

***Benefit***

Lower Tread Stiffness to  
Improve the Grip  
Performance

# Product Features & Benefits.

- Pattern Design

**Feature**

Zigzag Grooves Design  
Increases Number of Biding  
Edges

**Benefit**

Provide Good Snow Traction  
and Handling Capability

# Product Features & Benefits.

- Pattern Design

***Feature***

Chamfered Block Edges

***Benefit***

Avoid Irregular Abrasion
